

Sustainability Strategy

Crafting a sustainable built environment for the future.

In this era of heightened global awareness, sustainability considerations are shaping the future of the real asset industry.

Sustainability is not just a trend, but a strategic imperative for the built environment. A well-crafted strategy is crucial, providing a guiding framework that aligns values, mission, and sustainability objectives. Beyond compliance, it unlocks opportunities for innovation and resilience, ensuring real assets contribute positively to communities and the environment.

Integrating sustainability risks is no different to integrating standard financial risks into investment decisions.

At EVORA Global, we specialise in designing and delivering effective and practical sustainability strategies at the corporate, product and asset level.

We passionately believe that value-driven integration of sustainability into your investment management strategy is fundamental to achieving success.

Our proven **4D Approach** serves as the foundation for creating your Sustainability Strategy:

Development

Drivers

Initiate your Sustainability Strategy with the Drivers stage of our 4D Approach. By conducting Peer Reviews and Stakeholder Workshops, we thoroughly examine your sustainability goals. Our outcome is a transparent Roadmap Report that guides your path forward.

The next phase in the Drivers stage involves a Materiality Assessment. This process identifies and contextualises sustainability topics, emphasising the most crucial sustainability issues relevant to your organisation.

Design

After reviewing the Drivers for your Sustainability Strategy, we shift your focus to the Design stage of our 4D Approach.

This establishes your Sustainability Strategy Framework and Sustainability Policy to future-proof your real asset investments against sustainability risks and global trends.

Deployment

Delivery

After reviewing the Design for your Sustainability Strategy, we shift your focus to the Delivery (and Deployment) stage of our 4D Approach.

This equips you with the tools and mechanisms necessary to bring your strategic vision to life and implement your set objectives.

Disclosure

After implementing the Delivery stage of your Sustainability Strategy, we shift your focus to the Disclosure stage of our 4D Approach.

The Disclosure stage helps you meet the voluntary and mandatory internal reporting and external disclosure requirements identified in the previous three stages: **Drivers**, **Design** and **Delivery**.

Our Mission

To establish sustainability and carbon as foundational factors for investment decisions.

Our Purpose

To accelerate the adoption of real asset sustainability and enhance the wellbeing of the planet and its people.
